Filed: June 28, 2001 Examiner: Pritchett, J.

For: METHOD FOR THE DETECTION OF DYES IN FLUORESCENCE MICROSCOPY

Commissioner for Patents  
Alexandria, VA 22313-1450

**PETITION FOR ADMISSION OF COLOR FIGURES**

**37 CFR 1.84(a)(2)**

**MPEP 608.01(f)**

SIR:

Please consider the attached figures for admission in the above captioned pending application. A fee for \$130 under 37 CFR 1.17(h) is attached.

REMARKS

As explained in the specification, Figures 13c and 13d are important to understanding one embodiment of the applicants' microscope invention which for example can show different dyes present in living tissue on a color display.

In Figures 13c and 13d, three separate dyes are shown by three different colors. This is how the colors appear on a display to a microscope user. Therefore, color is an important and necessary aspect of these figures which is not seen as well in black and white.

The specification has been amended to incorporate the required language regarding color figures in the description of the drawings section.

Therefore, it is respectfully requested that figures 13c and 13d be entered.

Respectfully submitted,

Gerald H. Kiel, Reg. No. 25,116  
Attorney for Applicants  
Reed Smith LLP
